

DATA SHEET

Water Bottle Pre-Washer and Rinser

The Dayliff Bottle Washer is specially designed as an additional facility for use with Dayliff pure water plants to provide sanitised bottles for filling. Bottles are placed on a stand over a sink and the integral pump sprays water inside ensuring thorough flushing. Units are fitted with a double stainless steel sink that enables exterior bottle cleaning as well, all mounted on a stainless steel frame housing an automatic pressure pump that starts a pre-set timed flow when the start push button is activated. Plants are also fitted with a pre-filter and piping is arranged to enable water recirculation.

Dayliff Bottle Washers are essential accessories on bottling lines to ensure that bottles are suitably prepared for filling and assured water quality.

Technical Parameters:

Material: Stainless Steel

Prefilter: 1 mic 10" wound sediment

Pump Power: Dayliff DDG1000 0.8kW, 1ph

Size (LxWxH): 1315x530x1470mm
