

## DATA SHEET

## Pool Chemicals

<b>Chlorine 65</b>	1, 5, 20 & 45kgs	Granular Calcium Hypochlorite (65% available chlorine) is the most common compound for pool chlorination.
<b>Chlorine 90</b>	5, 20 & 50kgs	Granular Trichloroisocyanuric Acid (TCCA) (90% available chlorine) offers higher chlorine concentrations and the benefit of a water stabilizing carrier.
<b>Chlorfloat</b>	1.4Kgs	A convenient pool chlorine doser that contains dissolvable Chlorine tablets and floats on the water surface providing constant water chlorination. Supplied in one size for pools up to 70,000 litres, larger pools are dosed with multiple units. Options of TCCA Chlorine 90 or Calcium Hypochlorite 65 tablets are available.
<b>Chlorfloat Plus</b>	1.8Kgs	Chlorination as for standard unit though provided with a one-off dosage of granular booster water conditioner in the floater top that is an algaecide and adds extra sparkle to pool water.
<b>pH Minus</b>	5 & 20kgs	Liquid form Hydrochloric Acid (HCl) for pH reduction of high pH alkaline water.
<b>Dry Acid</b>	3kgs	Granular form Sodium Bisulphate ( $\text{NaHSO}_4$ ) is an acidic salt for use with high pH alkaline water. It is safer to handle and has similar properties to standard pH Minus.
<b>pH Plus</b>	5 & 20kgs	Granular form Sodium Carbonate ( $\text{Na}_2\text{CO}_3$ ) for pH increase of low pH acidic water.
<b>pH Plus Super</b>	1 & 5kgs	Powder form Sodium Bicarbonate ( $\text{NaHCO}_3$ ) that raises alkalinity to recommended levels and provides stability for pH and thus clearing cloudy pools faster
<b>Flocculant</b>	5, 20 & 50kgs	Granular Aluminium Sulphate $\text{Al}_2(\text{SO}_4)_3$ is used for clearing heavily discoloured water and also increases filtration efficiency.
<b>Stabilizer</b>	1kg	Stabilizer contains Cyanuric Acid which chemically stabilizes pool water and reduces chlorine demand.
<b>HTH Sparkle IT</b>	1 litre	A water conditioner that clears cloudy water, improves filtration efficiency and adds extra sparkle to pool water. Available in dissolvable cubes and granule form.
<b>HTH Clear Blu</b>	180g	Dissolvable cubes that brings extra sparkle to pool water and reduces chlorine consumption.
<b>Algicure</b>	5 & 20 litres	For the effective removal of algae growth, especially when established on the pool walls and floor.
<b>Pool Magic Plus</b>	1,3 & 5kgs	Specially formulated liquid form polymer that gives pool water extra sparkle.
<b>Anti Stain</b>	5 & 20 litres	A detergent to remove scum and stains from the pool surfaces.
<b>Pool Booster</b>	1Kg	A strong blend of sulphates offering algicidal and clarifying effect on pools which reduces use of chlorine.
<b>Metal Remover</b>	1 litre	A detergent that eliminates metals including iron and copper from pool water, clears coloured water except algae and prevents staining of pool shell due to metals.
