

A selection of plastic bodied wall and floor brushes. The floor brush is made of superior nylon bristles and is specially shaped for awkward corners. Wall brushes are for removal of persistent algae and are available with either nylon or stainless steel bristles.

Manual vacuum heads that connect to the pool vacuum outlet via a vacuum hose. Options available are the Hi-vac brush and an 8 wheel sweeper with/without side brushes for effective removal of dust and debris. Also available are heavy duty sweepers effective for commercial applications.

Automatic pool cleaners offer the benefit of moving around the pool floor while vacuuming. Options include world leading Barracuda and economy Quality models, all of which are supplied complete with head, hose and accessories. Also available are 1m hoses used to extend suction hose length.

Options include a Leaf Net which is effective for removal of leaves and debris from the water surface and a Leaf Rake which is specially shaped for scooping debris from the pool floor. Also available is the heavy duty rake for commercial pools.

Standard 38mm floating vacuum hose available in lengths of 15m, for Dayliff. Also available are modular 0.9m sections that connect to make hose lengths of choice. The modular hoses have the advantage of being able to replace damaged sections.

Aluminum handles with standard fixings for all brushes, nets and vacuums. Options are either a single length of 6m or a telescopic design expandable from 2.4m to 4.8m

Options include floating or suspended thermometers for reading pool water temperatures in Centigrade or Fahrenheit and horizontal floating design that can be read from the pool edge.
